MESSAGE

DR. GABIOLA

MESSAGE

As we continue to navigate through the aftermath of the pandemic, I am excited to share with you some new developments for our non-profit organization. With the introduction of the hybrid model for healthcare, which combines in-person and telemedicine consultations, we can now reach out to more patients in rural areas without having to expand our team.

Our organization has been granted resources from Stanford's Center for Innovation in Global Health to further explore this helpful tool. We hope that this technology will enable us to provide care to underserved communities in a more efficient and effective manner.

I want to take this opportunity to thank our partners and everyone who shares our mission of helping underserved populations. Your support is invaluable in making a difference in the lives of those who need it most.

Please stay tuned for updates as we continue to move forward and grow our non-profit organization. Follow us on social media @abcglobalhealth and visit our website at www.abcsforglobalhealth.org

Thank you for your contributions
